Curriculum Vitae

Personal Details

Name: Y VAN DANG

Title: Backend Engineer — Python | Django / FastAPI | PostgreSQL | ETL

Location: Vietnam — Available for Remote Work

Mobile: 0908133919 | **Email:** dangvany@gmail.com

Apply for: [Remote] Backend Engineer (Python, Django/FastAPI)

Professional Summary

Backend Engineer focused on Python, Django/FastAPI, PostgreSQL, and data pipelines. Over some years of building backend systems for SaaS and banking products, including 4+ years with Python APIs and services. I design and optimize RESTful APIs, ETL pipelines, and background helps teams can reasily expose large datasets. Comfortable working with Redis caching, task queues, and collaborating closely with frontend engineers on clean API contracts.

Career Summary

Timeline	Company & Position
Sep 2022 to present	**GEAR INC** — Senior Backend Engineer (Python / FastAPI / APIs / Data)
Nov 2020 to Aug 2022	**SACOMBANK** — Backend Engineer
Sep 2016 to Oct 2020	**PRUDENTIAL FINANCE** — Backend / Software Engineer
Jul 2013 to Aug 2016	**RINGER VIETNAM** — Software Engineer
Jun 2009 to Jun 2013	**GAMELOFT** — Developer

Professional Experience

Gear Inc (Sep 2022 to Present)

Senior Backend Engineer (Python / FastAPI / APIs / Data)

- Own high-level goals and shape them into production-ready Python services using FastAPI (and Flask where appropriate)

- Design and build RESTful APIs consumed by internal tools and external integrations; define clear, versioned API contracts with frontend teams
- Develop and maintain data pipelines and ETL/ELT-style syncs between internal systems and third-party platforms (batch and near real-time)
- Optimize PostgreSQL schemas and queries for reporting and analytics workloads; ensure reliability and performance on large datasets
- Implement caching and background processing patterns (Redis, task queues) to handle asynchronous and long-running jobs
- Use AI tooling (LLMs, RAG, automation) to accelerate development and improve data processing flows where specifications are incomplete
- Collaborate on architecture, data models, schema migrations, and Docker/CI/CD pipelines for production deployments

Sacombank (Nov 2020 to Aug 2022)

Backend Engineer

- Delivered backend services for large-scale internal banking applications used by business and operations teams
- Designed and optimized PostgreSQL schemas, indexes, queries, and migrations; built reliable RESTful APIs for internal and partner system integrations
- Implemented batch and incremental data sync jobs (cron-based and queue-driven) for reporting and reconciliation use cases
- Shipped integrations between modern services and legacy systems with a focus on clean, maintainable code and observability

Prudential Finance (Sep 2016 to Oct 2020)

Backend / Software Engineer

- Built backend systems supporting internal tools and workflows used by operational and business teams
- Designed data models and APIs; maintained and evolved large-scale applications with attention to reliability and tests
- Developed ETL-style processes to move and transform customer and transaction data between operational systems and reporting stores
- Worked with background processing and job queues to handle long-running workflows and reduce load on core APIs

Ringer Vietnam (Jul 2013 to Aug 2016)

Software Engineer

- Built backend components and APIs for digital platforms; implemented application logic and data layers for production systems

Gameloft (Jun 2009 to Jun 2013)

Developer

- Implemented gameplay systems and UI features; collaborated with designers and product teams; contributed to production releases

Academic Background

Bachelor of Design and Multimedia, RMIT University Vietnam

Core Skills

- **Python Backend:** 5+ years building backend services with Python; FastAPI and Django REST APIs; authentication, validation, pagination, error handling
- **ETL / Data Pipelines:** Design and maintenance of ETL/ELT workflows; batch and incremental sync of data across systems; monitoring and recovery
- **Async & Background Jobs:** Experience with background job processing and task queues (Celery-style workers); scheduling, retry, and idempotent job design
- **Data & Databases:** Strong PostgreSQL skills; schema design, indexing, query optimization, and performance tuning on large datasets
- **Caching & Integration:** Redis-based caching patterns; integration with third-party REST and e-commerce-style APIs; focus on reliability, observability, and fallbacks
- **Frontend Collaboration:** Comfortable reading and working with HTML, CSS, React/Next.js code to debug and iterate on API contracts with frontend teams
- **Infrastructure:** Docker, AWS, CI/CD; experience with microservice-style architectures and event-driven patterns (Kafka-based in portfolio projects)
- **AI in Daily Work:** Use LLM tooling (RAG, LangChain-style flows) to automate data extraction, enrichment, and internal workflows

Portfolio Projects

- **AI Backend Job Finder:** Scrapes job sites, LLM filters backend jobs, desktop UI. — View
- **AI Email Router:** LLM classifies email intent, routes to department, desktop app. — View
- **Case mini backend:** Mini case/order management API: CRUD, validation, pagination. Spring Boot, Redis cache, Swagger, Docker. — View
- **Microservices:** Multiple Spring Boot services, event-driven via Kafka. PostgreSQL, Redis, built to scale, Docker. — View
- **Payment transaction API:** Safe payment transaction API: idempotency keys to avoid duplicates, transaction-safe DB operations. Spring Boot, PostgreSQL, Redis. — View
- WWE Champions Game (Product Management & UI) — View
- Sacombank Digital Banking Platform (Product Owner) — View

- HDBank Mobile App (Product Strategy) — View
- Outdoors Marketplace (Product Manager) — View
- Third Place Marketplace (Product Owner) — View
- EVN App (Product Roadmap) — View
- Propzy Mortgage (Product Requirements) — View
- Playsweep (Web and Game) — View
- Arcane Rush (Web and Game) — View
- EIM (Employee Management) — View
- BPO (ERP) — View

Other Trainings

- Product Management Professional Certificate — View
- Certified Scrum Product Owner (CSPO) — View
- Google UX Design Certificate (Coursera) — View
- AWS Certified Cloud Practitioner — View
- Data Analytics for Product Managers — View
- The Complete Web Development Bootcamp (Udemy) — View
